for
CUTTING

MODEL SC-2
Pat. No. 3,209,635

**The *ULTIMATE* in
tape splicers**

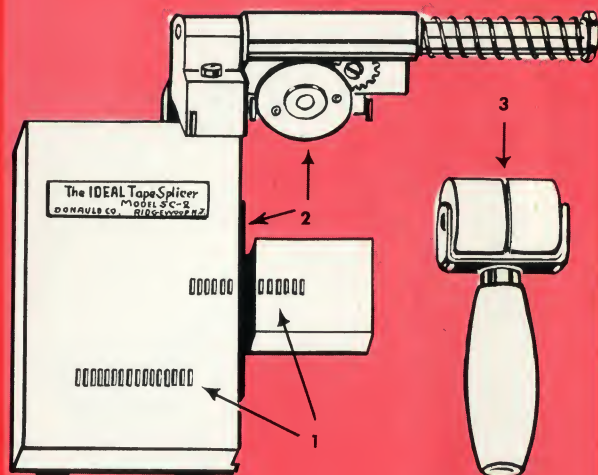

for
SPLICING

Place tape on upper pins for cutting to match tape ends or to edit tapes.

IDEAL splicing permits uninterrupted transmissions without loss of a character.

All metal 5" x 5 1/2" x 3" with non-skid base. Weight 2 1/2 pounds.

1. Two rows of feed hole pins; one for splicing and one for cutting.
2. Floating self-sharpening rotary knife and stationary lower blade for straight, clean cuts.
3. Slotted nylon roller for sealing splices.

Improved version of original IDEAL Tape Splicer for mending torn tapes and occasional splicing.

MODEL S-3

**For splicing and editing
all perforated tapes**

To make an IDEAL splice:

- Remove backing and place an IDEAL Splicing Patch on block, adhesive side up, with "feed holes" over pins.
- Place torn or matching tapes end-to-end with "feed holes" over pins.
- Apply pressure with nylon roller to seal. Remove completed splice.

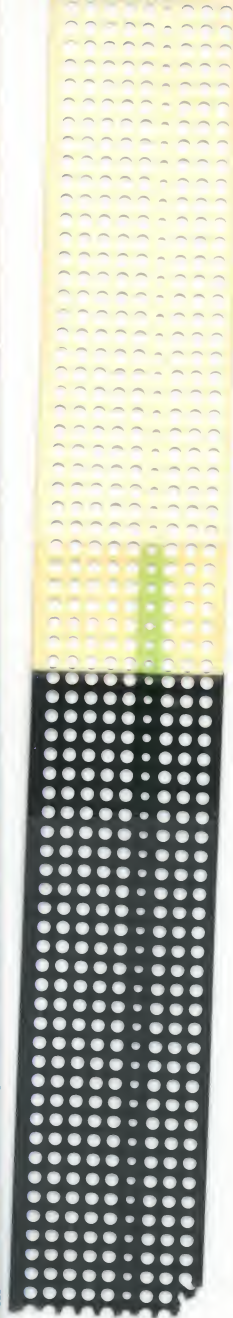

TAPE SPLICERS

- Butt (end to end) splicers for all equipment.
- Feed Hole Alignment —
Accurately spaced pins
assure perfect registration.
- One splicer handles all tapes.
- Pressure Sensitive Splicing —
no heat or moisture required.

SPLICING PATCHES

- Fully punched pressure sensitive patches with an adhesive for sealing oiled tapes.
- Two piece backing for easy removal.
- IDEAL Patches will read on optical units and on mechanical units.
- For "loops" apply patches to both sides of the tape.
- Available in standard 5, 7, and 8 channel. 6 channel with advanced feed holes for typesetting.
- Packed in plastic boxes of 1 gross each.

The METHOD of splicing

Currently being used by:

- AIR LINES
- BANKS
- COMMUNICATIONS COMPANIES
- COMPUTER MANUFACTURERS
- DATA PROCESSING CENTERS
- GOVERNMENT AGENCIES
- NEWS SERVICES
- NUMERICAL CONTROL
INSTALLATIONS
- PUBLISHERS
- RAILROADS
- TYPESETTERS

for correcting, repairing and altering
tapes; as well as splicing short tapes for
continuous transmission.

Improved version of original IDEAL Tape Splicer for mending torn tapes and occasional splicing.

MODEL S-4

For splicing and editing all perforated tapes

To make an IDEAL splice:

- Remove backing and place an IDEAL Splicing Patch on block, adhesive side up, with "feed holes" over pins.
- Place torn or matching tapes end-to-end with "feed holes" over pins.
- Apply pressure with nylon roller to seal. Remove completed splice.
